We are proud to be the distributor and retailer of GripMagic™ D.I.Y— The world's best non-slip treatment process for all tile and stone floors. It is a truly remarkable process that permanently, quickly and invisibly fixes slippery tiled, stone, ceramic & porcelain surfaces – inside or out. GripMagic™ is **NOT** a coating – it's a process that changes the molecular structure of the surface of the tile or stone, permanently changing its co-efficient of friction. It cannot scrape off or chip, not requiring periodic re-application. Working at molecular level, it is invisible to the naked eye. Even if you ran your hand over it, it won't feel "bumpy" like most other non-slip coating treatments. This ensures ease of cleaning and maintenance. Once treated, a GripMagic™ safety surface feels safe underfoot. And in the wet, it can save many nasty slip or fall injuries so pedestrians feel safe and confident.

International Standards for Slip Resistance

GripMagic™ meets (and often surpasses) international benchmark standards from the UK, USA, NZ and complies specifically with AS/NZS4586 and AS/NZS4663. Australian Standards. Many global independent slip testing authorities, including CSIRO, continually confirm that the GripMagic™ process is suitable for installation in almost all wet pedestrian situations.

A Unique Product

GripMagic™ is the only treatment process of its kind available today, achieving required levels of slip resistance leaving polished surfaces brilliantly glossy.

GripMagic: • is permanent, invisible and has no adverse impact on the environment • Meets all, and surpasses many, of the International Standards for slip resistance on wet pedestrian surfaces • Is the only non-slip treatment product of its kind which retains high levels of gloss on porcelain and marble floors, while still achieving required slip resistance • Is a treatment, not a coating • Can be installed by a competent person in the household. • The installation process...is time efficient, meaning there is little or no down-time to worry about. Once installed, a GripMagic™ safety floor is permanent and designed to be easily maintained utilizing current cleaning arrangements. • Why be restricted to limited ranges of so-called "safety tiles" when GripMagic can turn ANY ceramic, stone or porcelain tile into a legally compliant safety tile? • Designers, households and architects the world over use GripMagic™ to improve design aesthetics and dramatically increase safety for their
