Return on Investment (R.O.I) Breakdown

The R.O.I stated here is not able to be as 'definitive' due to the actual charge per square meter that a particular client may be charged. However, earning potential into perspective your gross margin (after all your costs but not tax should be):

Low End -	₱150 per SqMt
Mid Range -	₱250 per SqMt
High End -	₱350 per SqMt

If we considered that the average Square Meters across just 10 jobs could be 500 SqMt per job, (therefore totaling just 5,000 SqMt of treated floor space at the Mid-Range gross margin of ₱250 per SqMt):-

Your **Gross Income** (after expenses) could be
₱1,250,000

We will discuss with you personally what your mark-up should be on different jobs, but suffice to say it is entirely possible to have an **R.O.I returned in a very short period of time.**

We generally like to say that you could easily work 5 - 10 days a month and literally live like a King!
